Work Experience

Web Developer (Intern)

May '23 - May '24

iNeuron Intelligence Pvt Ltd

Bengaluru, India

Developed user interfaces with modern JavaScript, HTML5, and CSS. Reviewed code to validate structures, assess security and verify browser, device and operating system compatibility. Employed coding practices based on commonly accepted standards to establish site layout and user interface and attended development programs.

Software Engineer (Intern)

Nov '25 - May '26

Techotlist

Hyderabad, India

Techotlist is similar to LinkedIn. Techotlist is a professional networking platform used to connect with colleagues, recruiters, and companies. It allows users to create profiles showcasing their skills, experience, and education. People use LinkedIn to search for jobs, post vacancies, and get recruited. The platform also supports content sharing like posts, articles, and professional updates like blogs in it.

Software Engineer (Intern)

Jun '26 - Present

Tenon10

Bengaluru, India

- Developed and integrated role-based onboarding email workflows, automating personalized communication based on user roles and improving the overall onboarding experience.
- Designed and implemented a Listings page with a structured, responsive UI for displaying and managing listing-related information.
- Developed and enhanced multiple application features across the platform, working across frontend components, API integrations, business logic, and existing application workflows.
- Used Claude AI as an AI-assisted development tool for code generation, debugging, understanding existing code, refactoring, and accelerating feature development while reviewing and adapting generated code to project requirements.
- Collaborated with the development team through Git/GitHub-based workflows, including feature development, bug fixing, code changes, and integration of new functionality into the application.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React, Tailwind CSS

Backend: Node.js, Express.js, MongoDB, REST APIs, NoSQL, MySQL

Programming Languages: Java, Python

Tools: Git, GitHub, VS Code, Postman

Deployment: GitHub, Netlify, Render

Personal Projects

Full Stack Todo App

React, Node.js, Express, MongoDB, GitHub

Created a responsive full stack application enabling users to create, update, and delete tasks. Backend APIs were built using Express.js with MongoDB for data persistence. UI designed in React with live task updates and mobile responsiveness.
